ELECTRONIC DATA INTERCHANGE RESOURCES

Revised: June 11, 2009

These companies can assist your efforts to comply with Kentucky's electronic data reporting requirements for workers' compensation.

This list is subject to change and does not constitute an endorsement for any of the companies listed, nor should it be considered a complete list of all companies able to provide these services. Companies are added to this list upon their request only.

The key is used to indicate the services available from each company, as follows:

D = Data Collection Agent   Carriers and self-insured employers with a small volume of workers' compensation reporting that are unable to send the reports electronically can use the services of a DCA, which keypunches the information from the paper forms and transmits it electronically. The fee for this service is to be agreed upon by the DCA and the carrier/employer. Many third-party administrators will also be able to provide this service.

S = System Consultant   Can assist you in developing an electronic data reporting system, or adding electronic data reporting capability of your existing computer system.

V = Value-added Network   Better known by the acronym VAN, these are the "electronic post offices" that make the actual electronic data interchange transmissions possible. Each agency that sends and receives electronic data must have a VAN mailbox.

KEY	COMPANY NAME	PHONE	CONTACT
V	HealthTech	(913) 764-9347	Mark Hughes
D,S,V	ISO wcPrism	(201) 469-2238	Jim Eldridge
		(201) 469-3824	Robbie Tanner
V	IVANS	(813) 288-3285	Chris Walser
